Summary

I am a software developer driven by a passion for building efficient, user-focused solutions to real-world problems. I value continuous learning, innovation and clean, practical design. I aim to create scalable technologies that deliver real impact and drive innovation.

Education

Advanced Certificate in Apprenticeship, Refactory Academy
09/2025 – 04/2026

Advanced Certificate in CSE-javascript, Refactory academy
06/2025 – 08/2025

Bachelor of Science in Physiotherapy,
Mbarara University of Science and
technology
08/2019 – 05/2023

Awards

AI Starter Kit Certificate, ALX_Africa
20/05/2025

Professional Experience

Lead Frontend Developer, Old Mutual Uganda 🇸🇰
11/2025 – 04/2026

- Architected the full React-based component structure from scratch, enabling scalable reuse across channels and supporting a shift to **65% automated digital sales interactions**.
- Designed and built a custom chat bubble system with branded styling, typing indicators, and timestamped animations, improving message clarity and enabling the bot to handle **≥65% of top-tier queries**.
- Developed interactive card components that transformed plain text into structured, scannable UI, reducing product exploration time and driving higher engagement in digital sales journeys.
- Built a multi-step guided quote flow within the chat, enabling seamless conversational quote generation and contributing to **end-to-end journey mapping across insurance products**.
- Designed and implemented full conversation flow architecture, ensuring smooth navigation across onboarding, product selection, FAQs, and achieving **≥95% handoff accuracy for complex queries**.
- Established the chatbot's design system and delivered a responsive, embeddable web widget, ensuring consistent cross-device performance and supporting scalable digital interaction delivery.

Skills

- **Languages:** JavaScript, Typescript, HTML, CSS
- **Frameworks & Libraries:** React.js, Vue.js, Node.js, Express.js, Tailwind CSS
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools & Platforms:** Git, Github, Trello
- **Practices:** TDD, BDD, RESTful APIs, Agile methodologies
